

# 2021 ANNUAL REPORT

**Noordhoff  
Craniofacial Foundation**  
財團法人羅慧夫顱顏基金會

## MESSAGE FROM THE CEO

The year 2021 is full of challenges. Due to the pandemic, the Noordhoff Craniofacial Foundation (NCF) has modified the service type in Taiwan. We have used virtual meetings, instant messaging, telephone, and email to provide our domestic services for cleft families. The relief project has been started to help families who need financial assistance.

Globally, we have supported 3012 cleft patients to receive comprehensive care in seven countries with new partners in Brazil and Indonesia.

We have donated PPE, medical masks, and surgical supplies to our partner hospitals to cope with the need for extra medical materials. NCF also has arranged online missions to provide medical consultation for 16 patients with rare craniofacial deformities in Vietnam and Mongolia.

All of these results would not be possible without the support from our donors and partners. We are so grateful to have the blessing. "Love Makes Whole" is the NCF catchphrase, and we would like to invite you to join us to complete more lives.

# LOVE STORY

## Smiles in Ozamiz, the Philippines

Dr. Dax Carlo Pascasio, the NCF seed surgeon from the Philippines, has completed two medical missions in Ozamiz, a small town in the southern Philippines, in 2021. The team has provided 75 cases of free surgery for local cleft patients by NCF sponsorship.

“The mission is very challenging because of the pandemic, but it is very rewarding to see the smiles of the cleft babies and their families.” Dr. Dax will continue the mission in 2022 and expect to provide 160 cases of surgery for local cleft patients.

# LOVE STORY

## Pao with NCF

Pao is from Taiwan. Pao's cleft lip and palate were detected at his 20-week prenatal ultrasound. Pao's mom was very worried and even considered having an abortion.

"I am grateful to the assistance from the NCF service. The consultation helps me understand the surgery and treatment for Pao." the mother said.

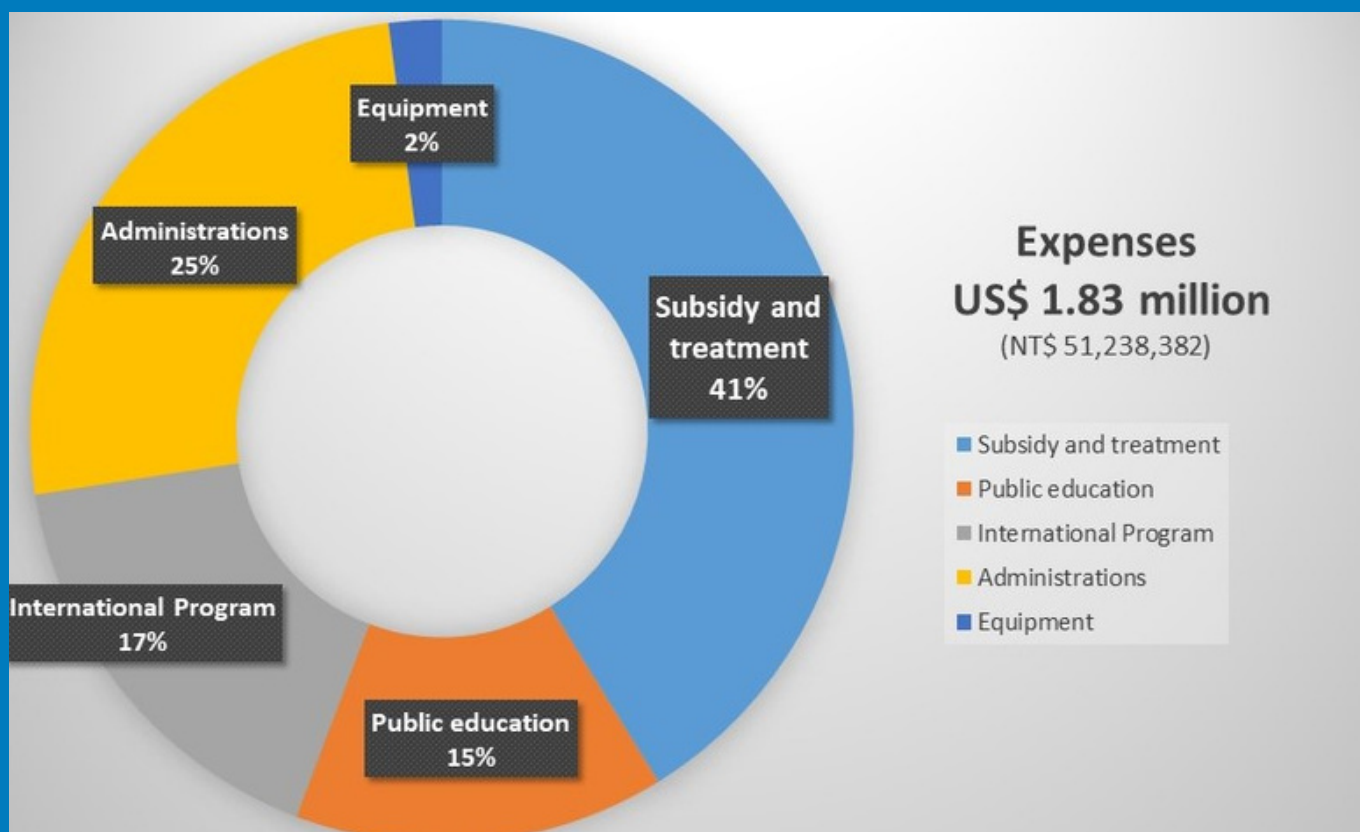

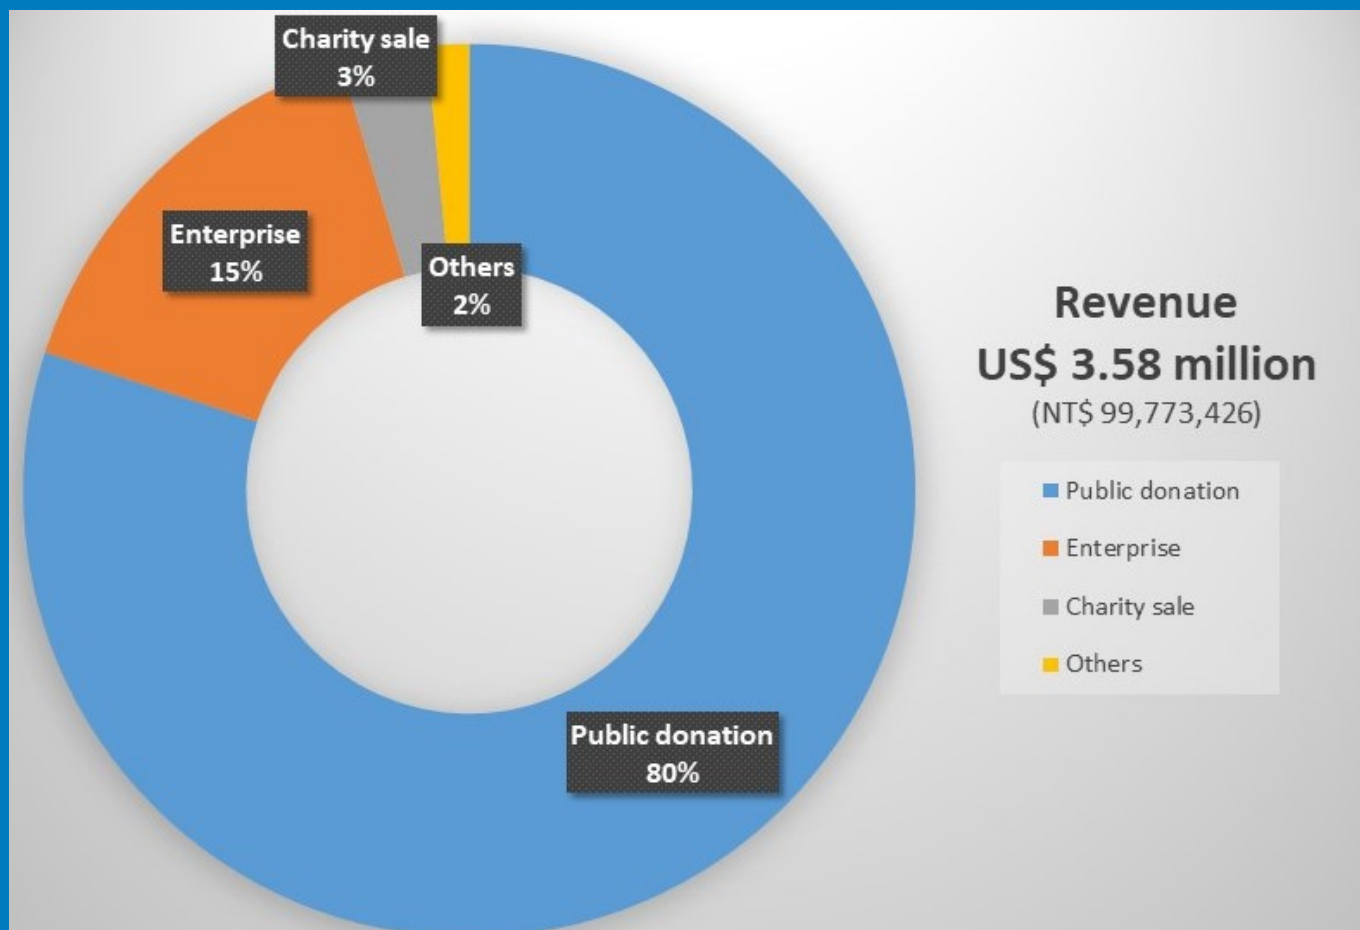

Pao received his lip and palate surgeries successfully in 2021. NCF has assisted around 1800 cases of cleft patients like Pao every year in Taiwan. "Love Makes Whole" is not only a slogan, but also an action

**"Changing a child's appearance goes far beyond surgery. It promotes confidence, gratitude to society, and helps the child understand love and how to share the love with others when the child grows up."**

**--Dr. Samuel Noordhoff,  
NCF Founder**
